AIを上手に活用した アプリ開発

Jaesung

どうやって際立つアプリを
AIと開発しよう？

How can I create the standout apps with AI?

活用例: Swift Student Challenge

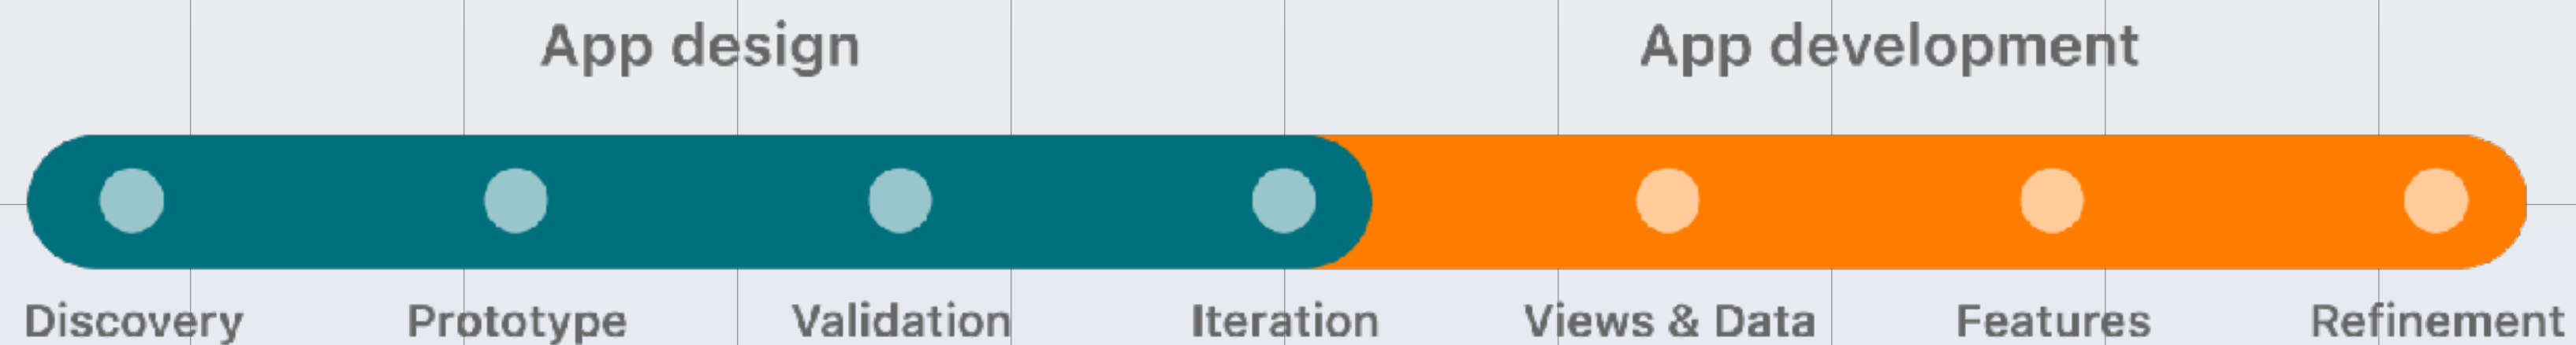

Swift Student Challengeとは?

Swift Student Challenge

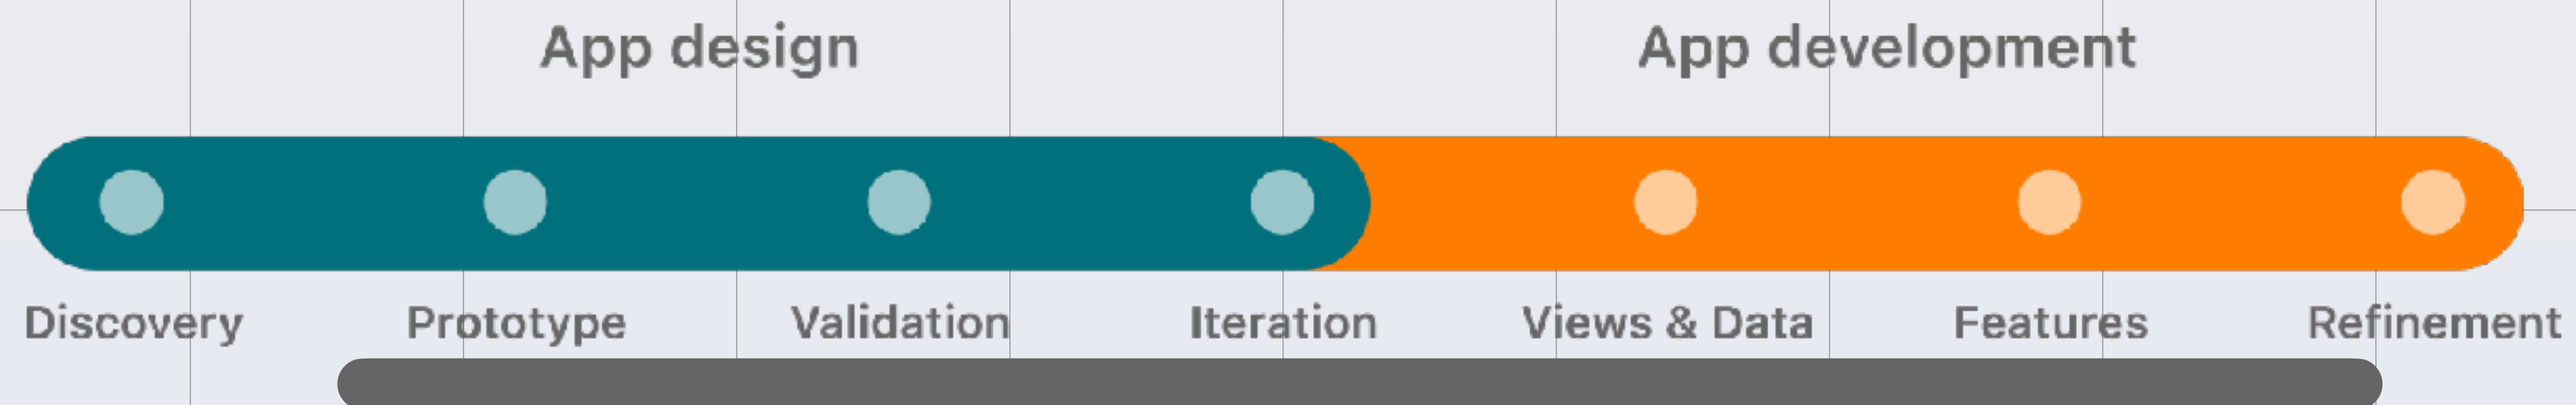

Apple主催の毎年開催のプログラミングコンテスト。
技術力だけでなく、課題解決やストーリーがとても重要

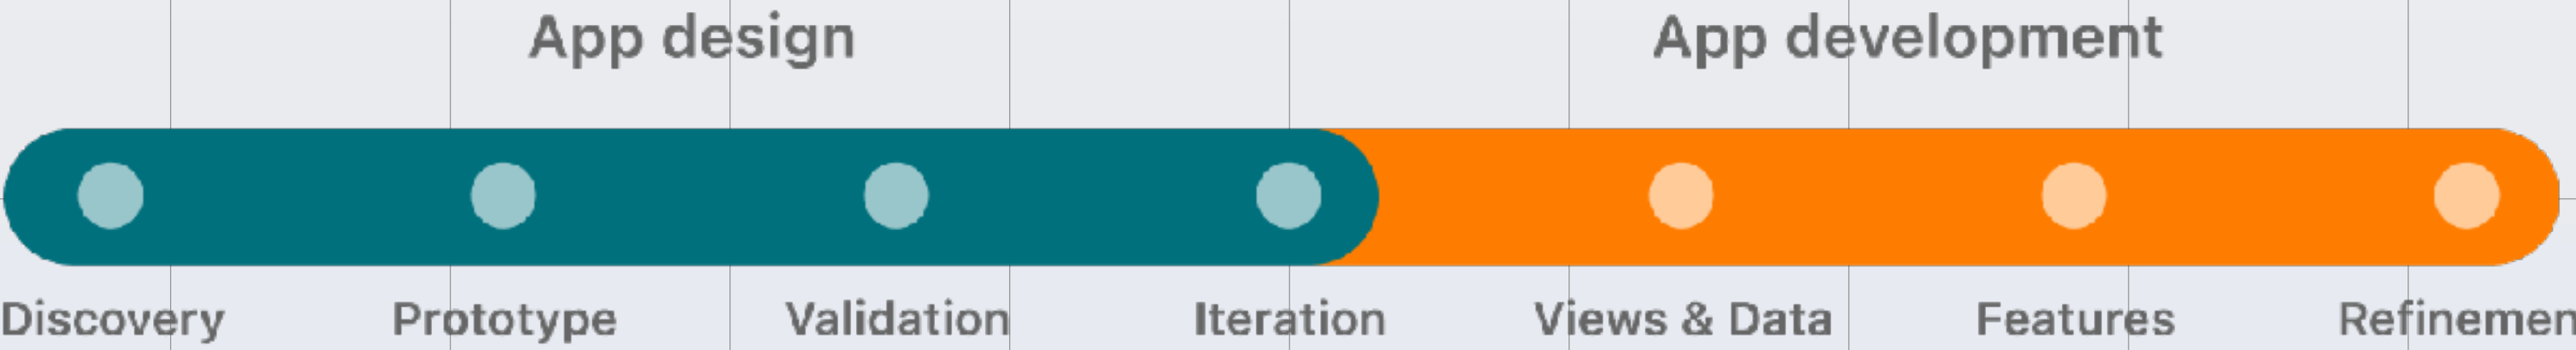

It's an annual program by Apple
Students from around the world show *their creativity*
by *building interactive app experiences using Swift*

● 何を作るかは私たちが決める
(We decide what to make)

ユーザーインタビュー
(User Interview)

Let's get to know
Swift Student Challenge
Korean winners' app

Unheard

音のない世界

App design

App development

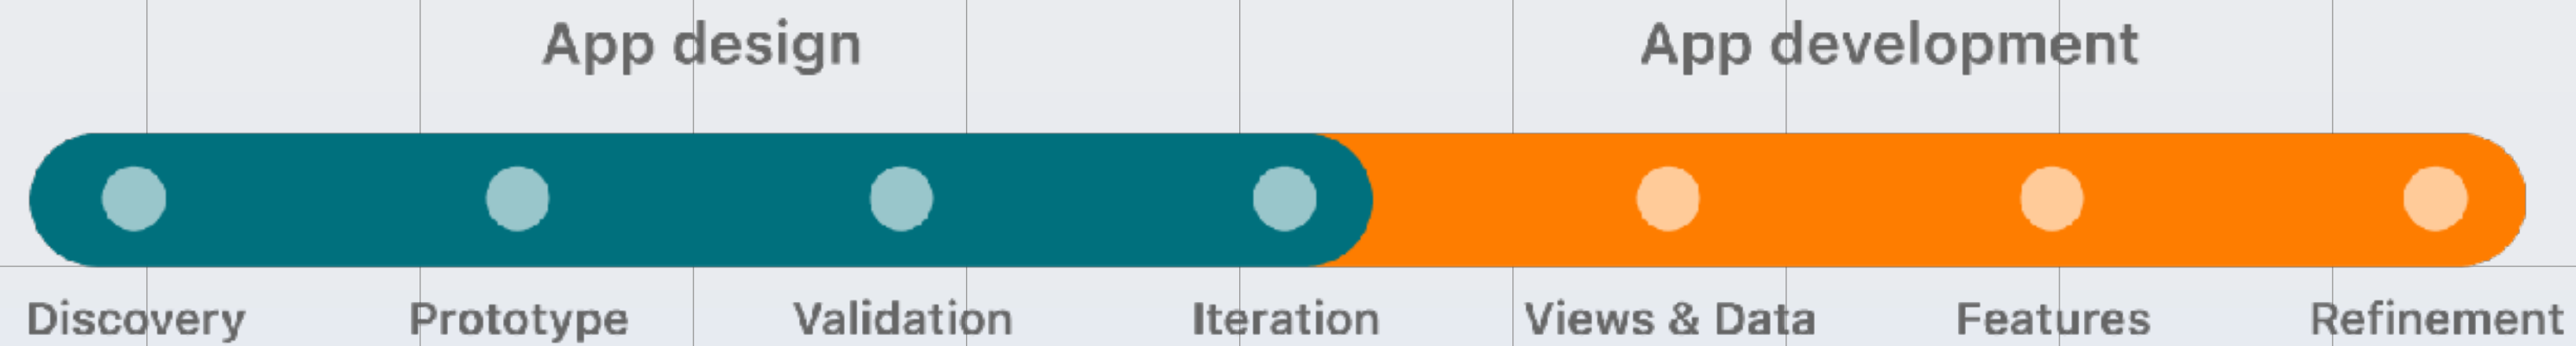

- I have hearing loss, and I've realized that many people don't understand it.
- How can I help people to understand hearing loss?
- Let's create an app that simulates hearing loss!

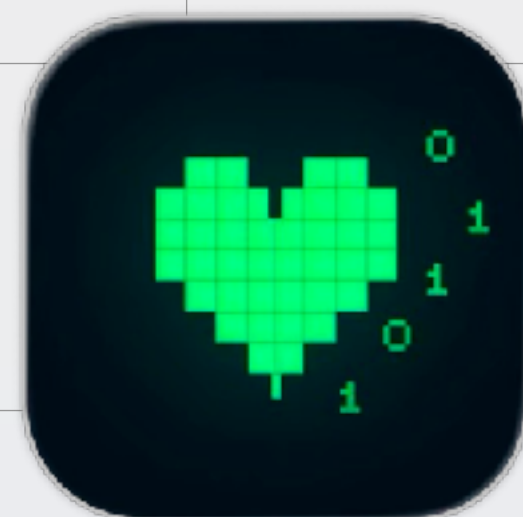

Unheard

音のない世界

- Let's create a prototype of the idea and validate it!
- Let's break down each step of the experience into components!

Binary World

Views & Data

Features

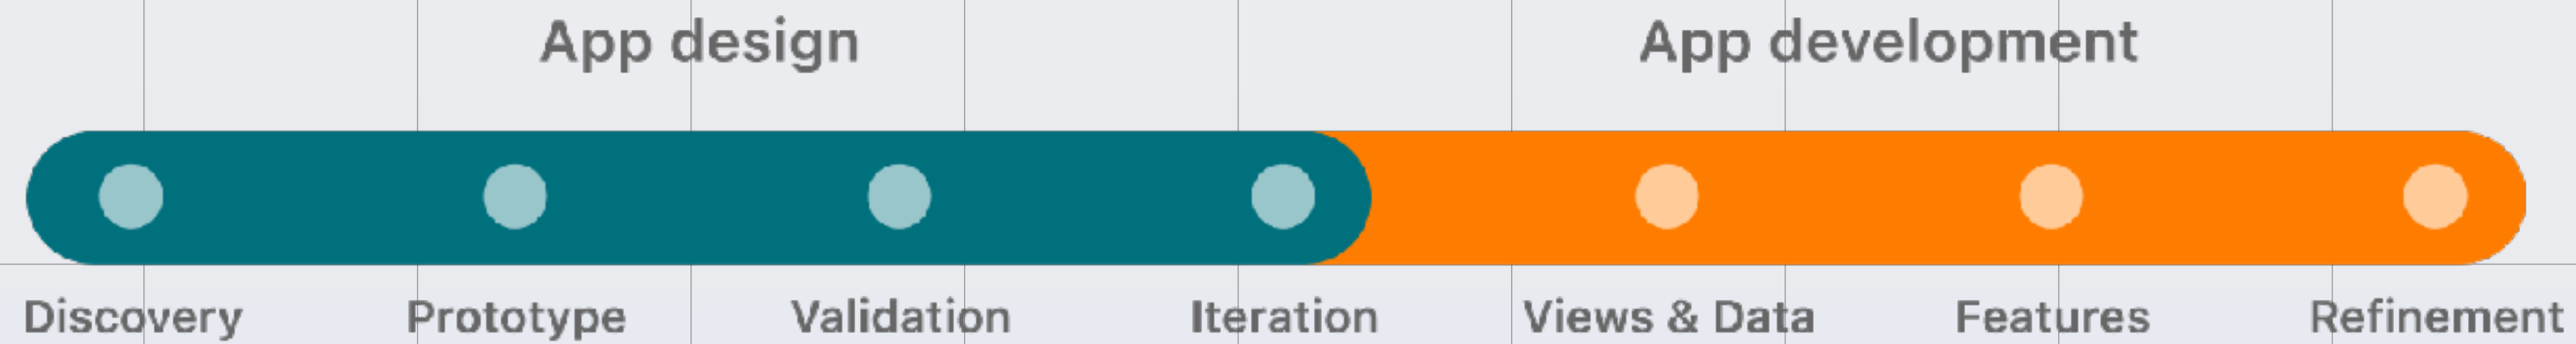

Refinement

- Many students find it difficult to understand the binary system
- How can I make it easier to understand the binary system?
- Let's create an app that experience the binary system through things we can see in everyday life!

Binary World

0と1のストーリー

- Let's ask for design assets that I need
- What other real-life examples of binary systems beyond what I've thought of?
- Let's get flow suggestions from AI to improve the UX

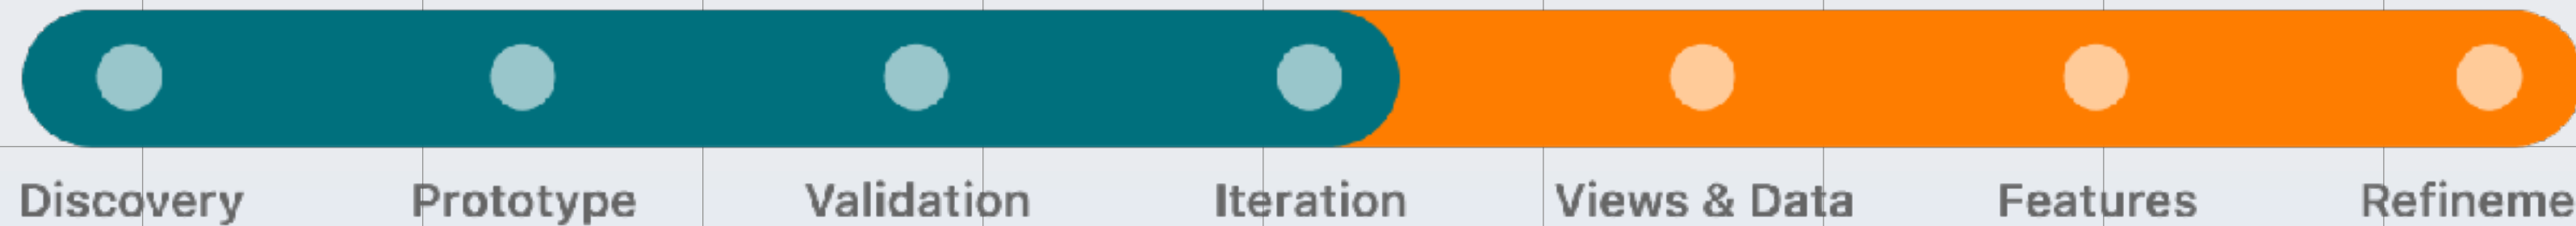

Why I Photograph

写真を撮る理由

App design

App development

Discovery

Prototype

Validation

Iteration

Views & Data

Features

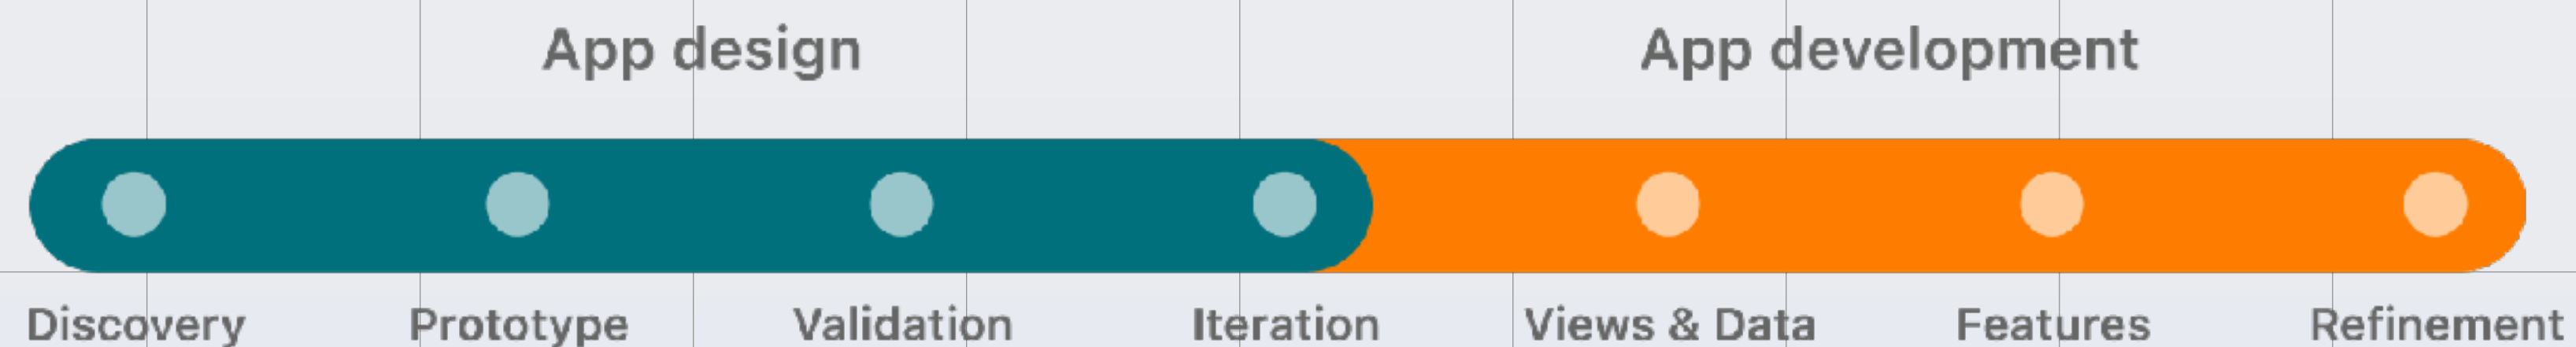

Refinement

- I really love taking photos
- How can I show others what photography means to me?
- Let's explore photography and capture perspectives and emotions in every moment.

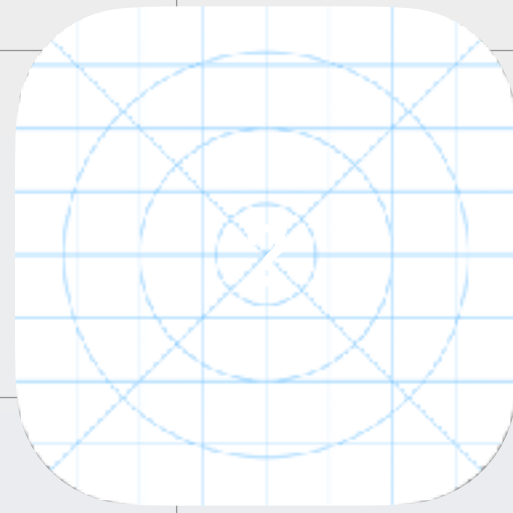

Why I Photograph

写真を撮る理由

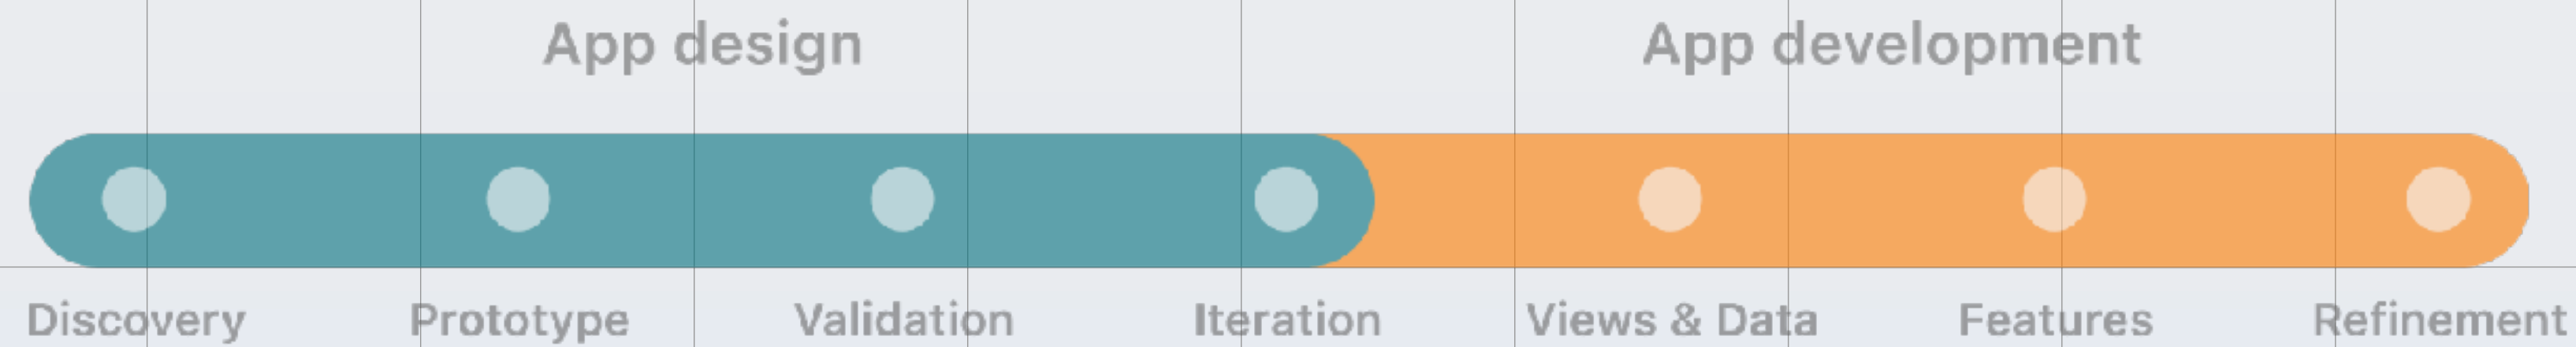

- Let's leave the coding to AI and focus on finding the joy!
- I need to tell AI the message I want to share, the features I want to show.

Your App

What's the message that you want to deliver?

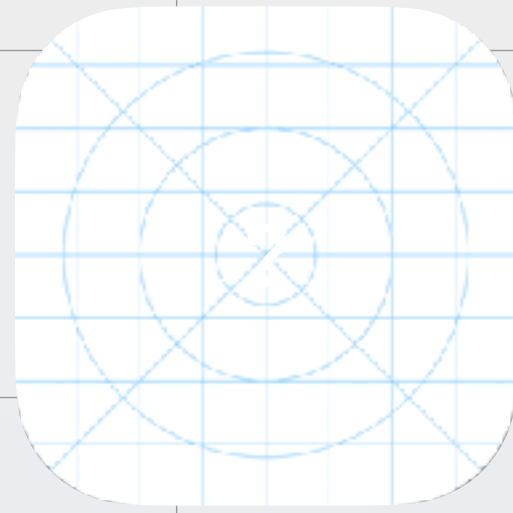

“App-worthiness”を決めるのは、あなた自身です。

- 「どんなメッセージを伝えたいですか？」
- 「どんな実質的な価値がありますか？ — 問題解決、それとも楽しさの提供？」

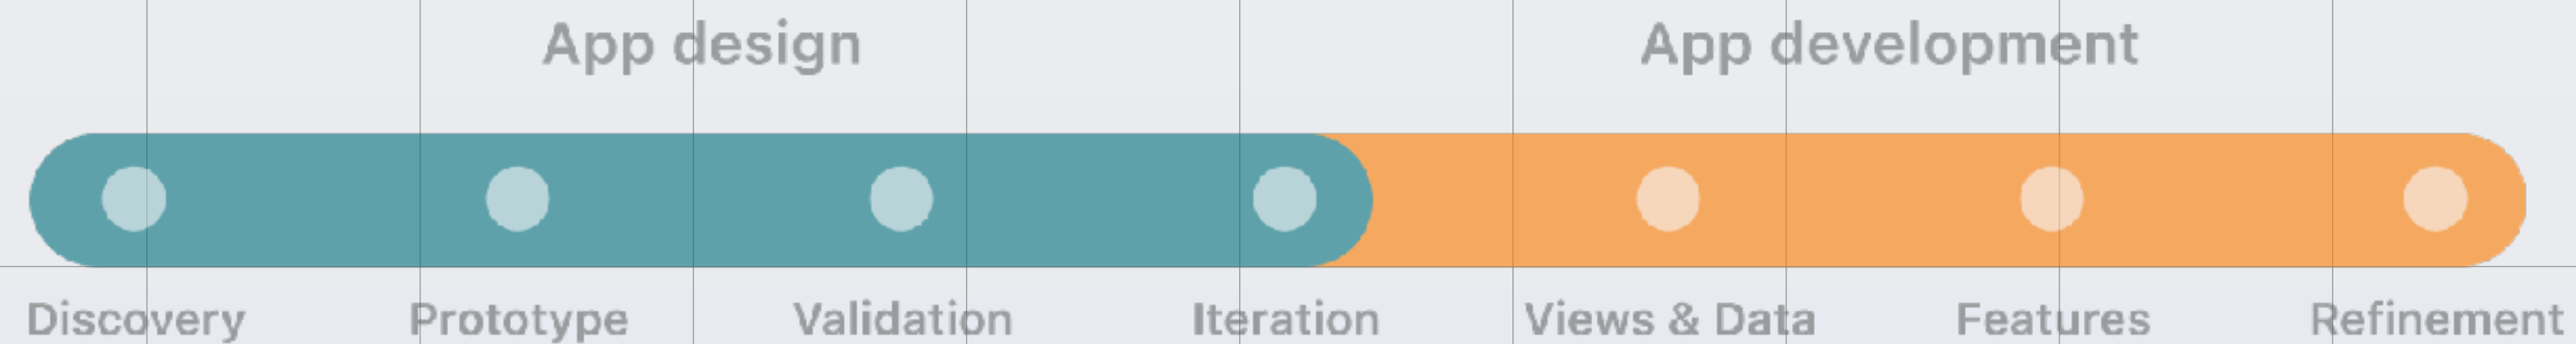

You decide what's “app-worthiness” of your app.

- “What message do you want to share?”
- “What real value does it offer — solving a problem, or bringing joy?”

Your App

What's the message that you want to deliver?

そして、AIはその価値を現実の世界へと届け、
ユーザーの手に渡すための「ツール」として使いましょう。

Then, use AI as a “tool” to bring the value into the real world
and place it in the hands of users
